QUANTITY in seeds is the first and most important factor to be considered by all market growers and florists. Your success depends on the quality of the seeds you sow. And the success of the House of Burpee has been possible by supplying its many thousands of customers with "The Best Seeds That Grow."

The continuous growth of the House of Burpee from a small beginning to the Largest Mail Order Seed House in the World is due to its policy of **Quality, Right Price, and Service.**

Burpee's Seeds are produced under the care of experts. They are tested twice on Burpee's Fordhook Farms. First the vitality is determined by tests made in the greenhouse, and then the purity is proved in the Famous Fordhook Trial Grounds. Burpee's Seeds are considered the standard. They are **Tested and Guaranteed.**

135 **Fordhook Giant Swiss Chard**

INTRODUCED BY BURPEE IN 1924

BURPEE'S FORDHOOK GIANT is an outstanding new Swiss Chard, which, in addition to its great value as a vegetable, makes such a handsome plant that it might be grown solely for decorative purposes in our flower borders. The color of the leaves is a rich blue-green, much crinkled or savoyed, the fully grown leaves averaging 10 inches in width by 2½ feet in length. The entire plant makes a

magnificent bush, not quite 2½ feet in diameter. The texture of the leaves is thick and fleshy, and their quality is highly appreciated when they are boiled. The stems

or stalks are **pearly white** and they measure 2½ inches in width. They are thick and succulent, and may be served as a separate dish in the same manner as asparagus, for which it is a splendid summer substitute.

FORDHOOK GIANT is a greatly improved variety of Swiss Chard, and we feel sure it will, when known, become the most popular Swiss Chard in cultivation. With every year more and more gardeners are including Swiss Chard in their planting list, as it is **one of the great health-giving greens** and there is no more profitable vegetable for the market grower, as it will yield continuously. Greens in abundance

are absolutely essential to our general health and well-being and they may be had in a most palatable form in our

NEW FORDHOOK GIANT SWISS CHARD. Even in markets where

Swiss Chard is little known it sells well under the name of Summer Spinach. **Pkt.**

1117 **Burpee's Self-Pruning Tomato**

INTRODUCED BY BURPEE IN 1924

BURPEE'S NEW SELF-PRUNING TOMATO is entirely distinct from all other tomatoes we have ever seen. The name Self-Pruning explains one of the outstanding characteristics of this most valuable novelty. The habit of the plant is distinct from the so-called dwarf or tree varieties and also from the ordinary long-jointed growth of the majority of tomatoes. While the plant is still comparatively small it sends out side-branches or laterals near the base without being pinched. This is a main characteristic of our new tomato and accounts largely for the immense yield the plants will give. At every joint of these lateral branches there are borne fruits which are perfectly smooth and very solid. The color of the skin is a bright pinkish red. The fruits are globe-shaped and most attractive in every respect, with an even color running

from the stem to the blossom-end. The interior of the fruit is a deep carmine-red and the flesh is solid, juicy, and altogether free from fiber or a hard core.

In season it is a second-early variety and we believe it is destined to become the **most popular of all globe-shaped pink-fruited tomatoes**. Extensive trials on our own farms in Pennsylvania and New Jersey for a number of years have proven that there is a distinct place for it. We also sent out trial packets to the agricultural experiment stations and received some very interesting reports, particularly from some of the southern states.

The variety was found to be as disease-resistant as some special strains which were bred for this purpose.

Tomatoes are a Great Burpee Specialty

Two Fine New Sweet Corns

Never since the introduction of Burpee's famous Golden Bantam Sweet Corn had we seen a variety which, in our opinion, could measure up to that wonderful little gem, until Dr. Herbert Hoffman, of Merchantville, N. J., called our attention to two sports which originated in his garden.

Dr. Hoffman, who practises osteopathy in Philadelphia, is a devoted gardener and an enthusiastic Burpee booster. Dr. Hoffman says: "During the fall of 1916 I found among my Golden Bantam an ear which showed all the characteristics of that variety but which had a few white kernels in it. No other corn being in the vicinity, I was very much interested in following up the origin of the white kernels and therefore separated them from the yellow kernels on the ear.

The following season I was much astonished to find that both came perfectly true. When I tried the first ears I was struck by the similarity of flavor between Golden Bantam and my twin sports which had also grown considerably larger ears the following year."

After we had tested both the white and the yellow varieties for a number of years and under varying conditions of soil and weather, we fully agreed with Dr. Hoffman that both Burpee's Sunnybrook and Burpee's Delicious have inherited the wonderful sweet buttery flavor of the mother Golden Bantam, besides growing to considerably larger size.

316 Burpee's Delicious

BURPEE'S DELICIOUS is a strong grower with plenty of healthy deep green foliage. As a rule each stalk bears at least **two fine ears** and quite often an individual plant will make as many as three or four stalks. The ears measure close to **eight inches in length** and they are closely filled with broad deep kernels. The color of the kernels is pearly **white** and it seems that the strong substantial husk aids considerably in preventing injury to the ears due to insects or bad weather conditions. BURPEE'S DELICIOUS is most remarkable on account of its **most delicious** buttery flavor. No other white Sweet Corn we know of, and we have tested almost every variety that has ever been offered, can compare with it in richness. This is the only white Sweet Corn that has the substance and flavor of Burpee's Golden Bantam. Pkt. 20¢; ½ lb. 55¢; lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.50; 10 lbs. \$8.50.

325 Burpee's Sunnybrook

BURPEE'S SUNNYBROOK is the other one of the twin sports and in size is a trifle smaller than Burpee's Delicious, but it makes up for its smaller size in maturing in from a few days to a week earlier. The ears have a small core and are closely set with broad kernels of a **bright yellow** color. BURPEE'S SUNNYBROOK is extremely meaty and of a **luscious sweet** flavor, which heretofore was the sole property of Golden Bantam. Growing to larger size it will be welcome to all those who showed preference for an ear somewhat larger than Burpee's Golden Bantam. We feel convinced that this will prove one of the most salable varieties on almost all markets. Pkt. 20¢; ½ lb. 55¢; lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.50; 10 lbs. \$8.50.

833 **Burpee's Sunnybrook Pepper**

The Sweetest and Most Prolific of all Pimento Peppers

BURPEE'S NEW SUNNYBROOK PEPPER is sure to become a leading variety for market as well as for home use. Early in September, when inspecting our fields of BURPEE'S SUNNYBROOK PEPPER on Burpee's Sunnybrook Farm in Gloucester County, New Jersey, we were very much pleased to find that our expectations for this fine variety did not only hold true but surpassed anything we had ever anticipated.

The plants are much branched and all sideshoots are heavily set with fruit. Upon counting a few plants we found that they bear as many as **40 perfect ripe fruits** on one plant.

The bushes grow 15 inches tall and measure approximately 22 inches in diameter. The branches, laden with clusters of fruit, bend down under the weight of the peppers. The photograph illustrates well the characteristic habit of the clusters. The individual fruits run from $2\frac{1}{2}$ to $3\frac{1}{4}$ inches in diameter.

They are from 2 to $2\frac{1}{4}$ inches deep from stem to blossom-end. The skin is smooth and glossy, of a **rich deep scarlet** color.

The most remarkable feature of BURPEE'S SUNNYBROOK PEPPER is its sweetness. We do not know of any other variety of pepper which really is as **sweet and palatable** as BURPEE'S SUNNYBROOK PEPPER.

The flesh is **unusually thick** and in well-developed fruits measures five-eighths of an inch in thickness, surpassing in that respect any other pepper. The foliage is rich deep green, smooth, and seems to resist insects and diseases well. Its shape and solidity make it a foremost **shipping variety** not liable to be damaged. BURPEE'S SUNNYBROOK PEPPER is a wonderful novelty. It matures very early, bears fruits continuously until frost, and is remarkably sweet. Pkt. 25¢; $\frac{1}{2}$ oz. 55¢; oz. \$1.00; 4 ozs. \$3.00; $\frac{1}{2}$ lb. \$5.50; lb. \$10.00; 2 lbs. \$18.60; 5 lbs. \$45.00.

Sweet as an Apple One of the visitors to Burpee's Sunnybrook Farm in New Jersey, when first tasting the new Sunnybrook Pepper, exclaimed: "My! It's as sweet as an apple."

Burpee's Sunnybrook Pole Lima Bean

Introduced by Burpee in 1922

The HOUSE OF BURPEE has reason to be proud of its work in connection with the improvement and introduction of new lima beans. The first large-podded bush lima bean in existence, namely, Burpee's Bush Lima, was introduced by us in 1890. In 1907 both the Burpee Improved Bush Lima and Fordhook Bush Lima were placed on the market by Burpee. In 1910 Burpee's Giant-Podded Pole Lima was introduced by Burpee, and in 1922 we offered this most outstanding pole lima bean which we have named BURPEE'S SUNNYBROOK POLE LIMA BEAN.

The main features of this fine new pole lima bean are its **extreme earliness** and **tremendous prolificness**, both qualities which are of **foremost importance to market growers**. The long flower-spikes are produced in great abundance from the base of the plant, in some instances even before the vines have taken hold of the pole, to the very summit of the vine. The individual spikes carry from 5 to 10 pods of large size. Each pod is closely packed with 4, and often 5, large thick meaty light green beans of the **finest quality**. It is considerably earlier in producing pods ready for picking than any other large-seeded pole lima, and has proven to be even as **early** as the Small-Seeded Carolina or Sieva variety.

The vines are of most vigorous growth, producing many lateral or side branches, all of which are literally covered with the deep green pods throughout the season. The plants begin to set pods even before they have made any appreciable growth of vines.

Pole Lima Bean**

One of the foremost lima bean growers in California assured us that, besides Burpee's Giant - Podded Pole Lima for late use, he **would grow no other variety but Burpee's Sunnybrook Pole Lima.**

An opinion like this from an authority on the subject speaks indeed well for this variety.

At the time of writing this page we have again had an opportunity to convince ourselves that this wonderful new pole lima bean fully lives up to the remarkable claims we made three years ago when we first introduced it to our friends and customers. It has proven to be a remarkable yielder of unusual earliness and superb quality. Market growers will find that it sells very readily on account of the good appearance of the pods.

66 **Burpee's New** **PHILADELPHIA** **Bush Lima**

The Earliest Maturing of all Lima Beans

The introduction of BURPEE'S PHILADELPHIA BUSH LIMA marks a distinct advance in the development of this popular and delicious vegetable. We are proud to realize that again we have an outstanding and **most meritorious novelty** in our NEW PHILADELPHIA BUSH LIMA. It is the result of a cross between Burpee's Fordhook Bush Lima and Wood's Prolific, and embodies the good qualities of both parents. The pods are ready for picking seven days ahead of Wood's Prolific and are of considerably larger size.

All extra-early varieties of Bush Limas hitherto introduced have small pods which usually contain but two or three beans, while our NEW PHILADELPHIA BUSH LIMA produces pods which are comparatively **large**, flat, and nearly straight. The average pods measure $4\frac{3}{4}$ inches in length and $1\frac{1}{8}$ inches in width, containing four fair-sized flat beans of **excellent quality**. In color and general appearance the foliage is similar to Wood's Prolific, but slightly larger. The plants are of upright habit, **producing pods in the greatest abundance** well to the tip of the flower spikes which rise clear above the foliage. The earlier pods, however, are set quite close to the ground and are borne in **clusters of six to eight**. Southern planters will find that it far surpasses the bush Sieva or "Butter Bean," as it matures its pods considerably earlier and bears a much heavier crop.

BURPEE'S PHILADELPHIA BUSH LIMA is hardy and requires a comparatively short season, which is of the greatest importance to our northern customers who are located in sections where other Lima Beans cannot be successfully grown due to the short season. In other sections its earliness will mean bigger profits for the market grower.

express, 100 lbs. \$37.00.

246 **Burpee's Fordhook Cauliflower** A MARVELOUS NEW EARLY CAULIFLOWER

Burpee's
Fordhook Cauliflower

This wonderful new cauliflower was introduced by us two years ago. It is undoubtedly **the finest and best of all early cauliflowers**.

Another season's experience with this variety has proven its outstanding merits. We have had occasion to talk to a number of growers who have tried it and all unanimously proclaim it the best early cauliflower in existence.

The plants are **dwarf and compact**, measuring about 16 inches in diameter. The stem is short so that the head is produced quite close to the ground. The heads are very firm and solid. They measure 6 to 9 inches in diameter and are of the very finest quality.

BURPEE'S FORDHOOK CAULIFLOWER has never failed to form good heads in our trials, even in a most unfavorable season, and when all other early varieties were almost a complete failure. The curd is snow-white, even, and exceptionally solid. We have cut fine heads in 85 days after sowing. Pkt. 25¢; 1/4 oz. 80¢; 1/2 oz. \$1.60; oz. \$3.00; 4 ozs. \$9.00; 1/2 lb. \$16.50; lb. \$30.00.

166 **Burpee's Fordhook Forcing Cabbage** A WONDERFUL NEW EARLY CABBAGE

Burpee's
Fordhook Forcing Cabbage

The introduction of BURPEE'S FORDHOOK FORCING CABBAGE has been of quite some importance, particularly to market growers, as it is essential to get into the market before there is an abundance of cabbage.

While BURPEE'S FORDHOOK FORCING CABBAGE is admirably **adapted for forcing** it is mostly, however, grown for **first early in the open**. The plants form comparatively small heads. They are perfectly round and of unusual solidity. On account of the few small outer-leaves, the plants may be set as closely as 8 inches apart, so that the yield in weight from an equal area is fully as heavy as that received from varieties with larger heads. BURPEE'S FORDHOOK FORCING CABBAGE originated with our friend Mr. Hartmann, of Copenhagen, Denmark. Pkt. 20¢; oz. 75¢; 4 ozs. \$2.25; 1/2 lb. \$4.15; lb. \$7.50.

119 **Burpee's New Sunnybrook Beet**

Burpee's
Sunnybrook
Beet

This is a new beet which should prove of unusual value, particularly to market growers, as it combines earliness, good appearance, and good quality. The roots are almost **globular** in form and sometimes slightly flattened. They are of medium size and have a rich **dark crimson** skin. When bunched, they make a most attractive appearance. The flesh is deep crimson throughout. It is extremely juicy, fine-grained, **tender**, and very **sweet**. The foliage is deep green, veined with rich crimson. The stalks of the leaves are also a rich deep crimson color. In cross-section the beet makes the most attractive appearance with its alternate rings of deep crimson and blackish crimson. One of the outstanding characteristics of

BURPEE'S SUNNYBROOK BEET is the fact that it retains its color well during cooking. It is an ideal all-season variety and excellent for storing. Pkt. 10¢; oz. 15¢; 4 ozs. 40¢; lb. \$1.25; 10 lbs. \$9.40.

Chinese or Celery Cabbage

The most essential requirement for successfully raising Chinese cabbage is cool weather. Where the summers are warm, sowing must be delayed until early August. In the vicinity of Philadelphia, the first week of August is the best time. The plants develop quickly, forming large, tightly folded heads of tender leaves which are well blanched in the heart. Chinese cabbage can be served as salad like lettuce or, when cut, makes a delicious cold-slaw. Boiled, it is even more palatable than ordinary cabbage.

Burpee's Floradale Farms

Burpee's Floradale Farms are famous as the California Home of Flowers. Floradale is located in the center of the fertile Lompoc Valley, about ten miles inland from the Pacific Ocean. The rich alluvial soil and the even and moderate climate in the valley combine to produce plump and full-of-vitality seeds of many vegetables and flowers. Floradale is famous particularly for the Burpee Sweet Peas. Acres upon acres of brilliant colors are spread out like a great Turkish rug. The different varieties are carefully separated by selected stocks of other Burpee flower seed specialties. Sweet Alyssum, Snapdragons, Larkspur, Calendula, Marigold, and many others too numerous to mention, grow to perfection in the moderate climate of sunny Santa Barbara County. A visit to Floradale Farms when the Sweet Peas and other flowers are in bloom is worth a trip across the continent. Lompoc is not far from Santa Barbara, a well-known California resort, and it is easily reached by train.

Burpee's Sunnybrook Farm

The warm soils of Gloucester County, New Jersey, are particularly well adapted for the growing of some of the more tender crops. At Sunnybrook Farms we grow seed of Peppers, Egg Plants, Melons, and Cucumbers, and the famous Sunnybrook strain of Earliana Tomato, as well as many other Vegetables and choice Flower seeds. And at Sunnybrook Farm we make our purity trials of Melons, Squashes, Pumpkins, and other Vine crops.

Burpee's Fordhook Farms

The largest and most complete trial grounds in America are located near Doylestown, Bucks County, Pennsylvania. It is at Fordhook Farms that we test and prove the quality, vitality, and purity of every lot of seed sold by the House of Burpee. Each year over 15,000 germination tests are made in the greenhouses at Fordhook, and over 7,000 purity trials in the open trial grounds, in addition to the numerous plantings for stock seed selection. Here also are acres of Tomatoes, Phlox, Poppies, Salvia, Zinnias, and many other Vegetable and Flower Seed crops.

BURPEE'S ANNUAL—The Leading American Seed Catalog

BURPEE'S ANNUAL for 1925 is an interesting book of 188 pages with more than a hundred of the finest vegetables and flowers illustrated in colors. It tells the plain truth about The Best Seeds That Grow.

BURPEE'S ANNUAL is indispensable as a reference book for market growers and florists. It gives true and detailed descriptions of all the leading vegetables and flowers, with hundreds of illustrations throughout the book. Our notes on planting dates and the information regarding the quantities of seed to sow are accurate and have been compiled from notes taken on our FORDHOOK FARMS in Pennsylvania. Keep your copy of BURPEE'S ANNUAL handy.

Early Flowering Sweet Peas

For Greenhouse or Outdoor Culture

The Winter Flowering Spencers are invaluable to florists for greenhouse culture, and they are also adapted to outdoor planting in warmer climates, such as our own Southern States, Australia, and South Africa, where the Summer Flowering Spencers cannot be grown successfully. In cooler climates they are of value because they bloom a week or ten days sooner than the Summer Flowering varieties.

Acres of Sweet Peas on Burpee's Floradale Farms, California

NEW BURPEE Sweet Peas

Summer-Flowering Varieties

3466 FORDHOOK BLUE—A distinct new shade

Fordhook Blue is a distinct Burpee novelty of outstanding merit. The color is rich azure-blue or light violet-blue, clearer and brighter than any other blue sweet pea in existence. It is practically a self color, though it lightens somewhat toward the edges of the standard and wings. The keel of the flower is heavily flushed with blue.

In addition to being a distinct new mid-blue shade in sweet peas, Fordhook Blue is a very strong grower. The sturdy vines produce an abundance of large blooms. Usually four magnificent flowers are arranged artistically on a long, substantial stem. The flowers are not only large, but they are also exquisitely waved and frilled. The long-stemmed sprays are easily arranged in bunches. They are most attractive for table decoration. We feel confident that Fordhook Blue will quickly become a great favorite, because of its fine appealing color, large size, and exquisite form. These characteristics will also create a great demand for this variety by all who desire the very best for exhibition. Pkt. (15 seeds) 25¢; ½ oz. \$1.25; oz. \$2.50; 4 ozs. \$7.50.

3448

BURPEE'S SUNSHINE

Bright Yellow-Pink

The sunny brightness of this great Burpee novelty suggested to us the name Sunshine. It is a radiant and glowing shade of soft but rich Hermosa pink with a distinct flush of deep primrose at the base of the standard. The reverse of the standard is beautifully flushed with a warm shade of yellowish amber, adding greatly to the pleasing appeal of the color. Even the keel is distinctively suffused with light lemon. The amber tint on the reverse of the standard and the primrose blotch, together with the lemon keel, add such life and richness to the flower that it might be described as "yellow-pink."

Sunshine is not only a distinct new shade with a wonderful appeal, but it is also a variety which invariably produces flowers of immense size. The individual sprays are long stemmed and nearly always carry four large blooms. They are massive, yet artistic and dainty. Both the standard and wings are well waved and crinkled. Sunshine makes a magnificent bunch, the color being most exquisite both by day and under artificial light. We feel confident that this novelty will soon be grown by all sweet pea lovers and those who plant for high-class markets. Pkt. (15 seeds) 25¢; ½ oz. \$1.35; oz. \$2.50; 4 ozs. \$7.50.

3579 **BURPEE'S ELECTRIC**

A fine new rich orange Sweet Pea

It is doubtful if any sweet pea makes a more attractive bunch than Burpee's Electric. The flowers combine immense size with grace and loveliness. There is a richness and live effect in the flowers that immediately attracts. The blooms are well rounded, the wings and standard being attractively waved and frilled. The color of the standard is a lovely shade of rich orange-red, enlivened by a glistening suffusion of bright salmon. A touch of salmon-rose near the base of the standard adds to its vivacity and glow. The color of the wings is well matched to that of the standard, being a pleasing shade of deep rose, evenly suffused with a bright sheen of orange. The general effect of the flowers when seen in bunches is a lovely and rich orange with a scintillating and iridescent effect.

Electric should prove very popular because of its brilliancy, which is as well exhibited under artificial light as by daylight. No color, no matter how outstanding, can make a variety popular unless combined with large size, good form, freedom of bloom, and strong growth. In Burpee's Electric we find a good combination of all these valuable characteristics. It is a wonderful new summer flowering Sweet Pea with immense well-shaped flowers of a pleasing color, borne most profusely on long and sturdy stems.

Pkt. (15 seeds) 25¢; ½ oz. \$1.35; oz. \$2.50; 4 ozs. \$7.50.

3551 **THE PRESIDENT HARDING**

Named by Special Permission of the Late President of the United States

The blooms are magnificent in every way. They are of exquisite texture and attractively waved and crimped. The flowers are borne profusely, four on a long and strong stem.

The President Harding is an entirely new color in Sweet Peas—**peach-red or salmon-cerise, suffused orange**. It was awarded the highest honors both in America and England. The American Sweet Pea Society gave it the **ONLY SILVER MEDAL** for the finest new Sweet Pea. The National Sweet Pea Society of Great Britain acknowledged its value with the **ONLY CERTIFICATE OF MERIT** for two years. **Pkt. 25¢; ½ oz. 65¢; oz. \$1.20; 4 ozs. \$3.50; ½ lb. \$6.50; lb. \$12.00.**

3556 **Radiance—A lovely La France pink**

It is almost impossible to express in words the exquisite beauty of this new Sweet Pea. The color is a pleasing and appealing shade of La France pink, which deepens in the center and toward the edges of the standard to eosine-pink. There is a delightful suffusion of salmon throughout both the standard and wings. The standard is very broad and erect, much frilled, and has a ray of rose-salmon down the center.

RADIANCE has a charming form. Both the standard and the wings are very large. Yet they are most artistic in their proportions and are gracefully waved and frilled. The huge flowers are produced in great profusion on long stout stems. The plants are most floriferous and make a very strong growth. Pkt. 25¢; ½ oz. 65¢; oz. \$1.20; 4 ozs. \$3.50; ½ lb. \$6.50; lb. \$12.00.

**Burpee's
Sapphire**

3584 **Sapphire**—A new wonderful bright blue

SAPPHIRE is a remarkably fine new blue Sweet Pea. It might be described as a bright Delphinium-blue—a color of outstanding purity and pleasing tone. The flowers are very large and are borne usually in fours on long stiff stems. The standard is broad and well-waved and the wings are also of excellent form, and their size is in proportion to the standard. They are artistically arranged on the long stem,

BURPEE'S SAPPHIRE is a most vigorous grower and extremely free-flowering. We feel sure that it will be one of the most popular Sweet Peas whether grown for exhibition, for cutting, or for garden decoration. The fine flowers are artistically arranged on the stems and easily made up into dainty bunches. Pkt. 25¢; 1/2 oz. 65¢; oz. \$1.20; 4 ozs. \$3.50; 1/2 lb. \$6.50; lb. \$12.00.

Summer Flowering Sweet Peas

We recommend these for general outdoor growing throughout the United States except in the extreme South, where Sweet Peas flower during the winter and where the Early Flowering type gives best results. Many Sweet Pea lovers plant a short row of the Early Flowering kinds to get the advantage of early blooms, but we recommend the Summer Flowering Sweet Peas for your principal crop for outdoor planting either during the spring or fall.

White

3435 Constance Hinton A well-known and popular black-seeded, white-flowered variety. The flowers are of large size and come at times with a bluish tinge. The vines make a strong and vigorous growth, producing a wealth of four-flowered sprays. Pkt. 10¢; ½ oz. 20¢; oz. 30¢; 4 ozs. \$1.00; ½ lb. \$1.50; lb. \$2.50.

3555 King White Improved Remarkable for the glistening purity of the whiteness and the perfect finish of the flower. Of gigantic proportions. Strong and very free-flowering. It is the finest white-seeded white variety, altogether free from any color. Of exquisite form and texture. Pkt. 10¢; ½ oz. 25¢; oz. 35¢; 4 ozs. \$1.05; ½ lb. \$1.65; lb. \$3.00.

3467 Edna May Improved A large flowering white variety of exquisite form, carried in fours on long substantial stems. An old favorite. Pkt. 10¢; ½ oz. 25¢; oz. 40¢; 4 ozs. \$1.20; ½ lb. \$2.20; lb. \$4.00.

3475 Burpee's Giant White A gigantic flower of exquisite form and pure color. Giant White is black-seeded and has been awarded a Certificate of Merit by both The American Sweet Pea Society and The Pennsylvania Horticultural Society. The handsome sprays carry four large blooms each. They make most artistic bunches. Pkt. 15¢; ½ oz. 30¢; oz. 50¢; 4 ozs. \$1.50; ½ lb. \$2.75; lb. \$5.00.

Cream

3405 Champagne (New) An extremely deep colored primrose self, having a pronounced yellow tone when the flowers are young. The very large blooms are beautifully frilled and borne usually four on a stem. A distinct advance in the primrose section. Pkt. 25¢; ½ oz. 85¢; oz. \$1.50; 4 ozs. \$4.50; ½ lb. \$8.30; lb. \$15.00.

3454 Floradale Fairy Improved An advance over all other cream-colored Sweet Peas. The standard and wings are large, exquisitely waved, and of wax-like texture. The color is a most charming and intense rich deep cream. The flowers are of largest size and artistic proportions. Pkt. 10¢; ½ oz. 25¢; oz. 35¢; 4 ozs. \$1.05; ½ lb. \$1.90; lb. \$3.50.

3419 Daffodil An outstanding new Sweet Pea of a rich deep cream color. A vigorous variety with long stems carrying four well-formed flowers. The blooms are exquisitely frilled. Pkt. 25¢; ½ oz. 85¢; oz. \$1.50; 4 ozs. \$4.50; ½ lb. \$8.30; lb. \$15.00.

Burpee's Snapdragons

The Snapdragons or *Antirrhinum* are a most important crop for all florists. They are cool house plants and should not be exposed to high temperatures, particularly during mid-winter. For mid-winter flowering the seed should be sown in April or May, but it is mostly for early spring blooming, particularly around Easter, that florists are growing Snapdragons to follow Chrysanthemums. Many florists have discarded the idea of using cuttings, as they find that plants grown from seed are more vigorous and more rust-resistant. Our improved strain of Snapdragons comes perfectly true. Every florist should grow a good lot of Snapdragons for summer and fall supply.

New Giant Snapdragons

This is an entirely new class of Snapdragons with blooms of immense size and wonderfully long flower-stems. The plants are strong and robust. The foliage is substantial and withstands to a large degree diseases, insect attacks, and unfavorable weather conditions. The plants send forth a large number of flower-stems which bear all along their lengths the large well-shaped blooms. This class contains some wonderful new colors.

1721 Canary Bird A pleasing and bright canary-yellow shade with a deep golden yellow lip. A very fine large flower. $\frac{1}{16}$ oz. 60¢; $\frac{1}{8}$ oz. \$1.10; $\frac{1}{4}$ oz. \$2.00.

1699 Carmine-Rose One of the very brightest shades among the Giant Snapdragons. The color of the individual blooms is a shining and luminous carmine-rose with just a touch of yellow on the lip. Makes a fine long spike. $\frac{1}{16}$ oz. 60¢; $\frac{1}{8}$ oz. \$1.10; $\frac{1}{4}$ oz. \$2.00.

1714 Crusader The flowers are very large and borne on spikes of great length. The color is a bright velvety reddish maroon with a distinct cast of bright crimson. $\frac{1}{16}$ oz. 60¢; $\frac{1}{8}$ oz. \$1.10; $\frac{1}{4}$ oz. \$2.00.

1715 Fordhook Rose The color of this beautiful novelty is a combination of rose, pink, and yellow, all delightfully blended and creating a most charming harmony. The great flowers are borne profusely. $\frac{1}{16}$ oz. 55¢; $\frac{1}{8}$ oz. \$1.00; $\frac{1}{4}$ oz. \$1.85.

1712 Maralda The well-formed and mammoth sized flowers are bright copper-carmine with a rich golden yellow lip. The long spikes are closely set with flowers. $\frac{1}{16}$ oz. 60¢; $\frac{1}{8}$ oz. \$1.10; $\frac{1}{4}$ oz. \$2.00.

1713 Orchid The flowers are a beautiful mauve-pink, not unlike the shade of Cattleya-orchid. The tube is a somewhat darker shade of mauve and there is just a tip of yellow on the lip. They are closely set along the majestic and substantial spikes. The spikes are borne freely. $\frac{1}{16}$ oz. 55¢; $\frac{1}{8}$ oz. \$1.00; $\frac{1}{4}$ oz. \$1.85.

1702 Ruby A distinct shade of deep ruby-red with a glow all its own. The tube is shaded deep purple-carmine. A strong grower and exceedingly free bloomer which can be depended upon to yield many fine long spikes. $\frac{1}{16}$ oz. 60¢; $\frac{1}{8}$ oz. \$1.10; $\frac{1}{4}$ oz. \$2.00.

1716 Snowflake This is the best white Snapdragon of all the tall varieties. The flowers are closely set on long spikes. The color is a creamy white with a pale yellow lip. $\frac{1}{16}$ oz. 55¢; $\frac{1}{8}$ oz. \$1.00; $\frac{1}{4}$ oz. \$1.85.

1701 Sunnybrook For richness and brightness in color Sunnybrook claims foremost place. The color is a blend of golden yellow, salmon, and light orange. $\frac{1}{16}$ oz. 60¢; $\frac{1}{8}$ oz. \$1.10; $\frac{1}{4}$ oz. \$2.00.

1717 Sunshine A distinct and truly glorious variety. The color is unique and outstanding, of a rich bright yellow which is greatly enhanced by a touch of pink in the tube. $\frac{1}{16}$ oz. 55¢; $\frac{1}{8}$ oz. \$1.00; $\frac{1}{4}$ oz. \$1.85.

Burpee's Zinnias

Fritz Bahr in his latest book on Commercial Floriculture says the following about Zinnias: "The Zinnias are fine summer flowers and even the florist should plant a lot of them to keep up the show. They will stand almost any kind of weather and keep on flowering until late in the fall. The retail grower should always grow a good-sized batch of them in 2½s for Spring and another batch should be kept coming along in the cold-frame." There is money in selling the seedlings out of the frames at fifty cents a dozen to the trade which comes to you for plants.

Giant Mammoth Zinnias

2821 GIANT ROSE Beautiful rose flowers of perfect shape. It has been greatly admired by all who have seen it growing for the past three seasons on our FORDHOOK FARMS. It is a beautiful new color and always of largest size. ¼ oz. 30¢; ½ oz. 55¢; oz. \$1.00.

2890 GIANT BURNT ORANGE A most appealing shade of burnt orange with a rich bronze sheen. Of very large size. ¼ oz. 30¢; ½ oz. 55¢; oz. \$1.00.

2813 BURPEE'S GIANT MAMMOTH MIXED Our strain of this magnificent large-flowered type is unsurpassed. The blooms are of immense size when well grown, averaging 3½ to 4½ inches in diameter and often 3 to 4 inches in depth. A well-balanced mixture of all colors. ¼ oz. 30¢; ½ oz. 50¢; oz. 90¢.

2820 BURPEE'S CURLED AND CRESTED The petals are elegantly twisted and curled, giving the flower a most attractive appearance. The plant grows 18 inches tall by 2 to 2½ feet in diameter and blooms freely until killed by severe frost. The colors range from white through many shades of yellow, rose-pink, and salmon to deepest crimson. ¼ oz. 30¢; ½ oz. 50¢; oz. 90¢.

2832 PICOTEE, MIXED The flowers are always of the largest size. Pink, light and rich yellow, orange, etc.—all tipped rich mahogany-brown on the end of each petal. The darker flowers are tipped with a contrasting light shade. ¼ oz. 40¢; ½ oz. 70¢; oz. \$1.35.

2808 Picotee GOLDEN PHEASANT A mammoth-sized flower, well-rounded, and borne on heavy, strong growing plants. The ground color of the blooms is a bright golden yellow, slightly shaded buff. Nearly every flower shows a touch of deep crimson-carmine at the tips of the petals. ¼ oz. 50¢; ½ oz. 95¢; oz. \$1.75.

2812 Burpee's New Cactus-Flowered Zinnia

Distinct in form from all other Zinnias, as the petals are so quilled that they become almost tubular. As the back of the petals is of a distinct color and as they incurve to form the tube, it gives the flower a bicolored appearance. The colors range through varying shades of yellow, orange, pink, and rose to scarlet and crimson. The flowers are borne in great abundance; on well-grown plants they will average 4 to 5 inches in diameter. ¼ oz. 45¢; ½ oz. 80¢; oz. \$1.50.

2835 Warrior A distinct new variety of bushy and compact growth, bearing a profusion of medium sized flowers. The individual blooms are fully double, well-rounded, and of a pleasing deep red maroon. ¼ oz. 45¢; ½ oz. 85¢; ¾ oz. \$1.65; oz. \$6.00.

Dahlia-Flowered Zinnias

BURPEE'S NEW DAHLIA-FLOWERED ZINNIAS are distinct in every respect. The flowers are of immense size, fully rounded, and are made up of a great number of small sized petals. The individual petals stand well apart, giving the flower an open and attractive appearance, which is distinct from the heavy and close effect of the Giant Mammoth type. These new DAHLIA-FLOWERED ZINNIAS grow into strong well-rounded bushes. They bloom profusely all during the summer and fall.

2892 CRIMSON MONARCH This attractive variety produces flowers of immense size. The blooms are perfect in form and are carried on heavy stems. They are borne most profusely and the color is a bright and appealing shade of crimson-scarlet. It is the darkest one of this class. ¼ oz. 45¢; ½ oz. 85¢; ¾ oz. \$1.65.

2896 EXQUISITE This is truly an exquisite variety of a pleasing shade of reddish rose shaded with deeper rose in the center. The flowers are large and full. They resemble a Decorative Dahlia. ¼ oz. 45¢; ½ oz. 85¢; ¾ oz. \$1.65.

2898 GOLDEN STATE An excellent flower of marvelous size and rich golden yellow color. As the flower ages there appears a cast of orange which is most beautiful. Very large and of true Dahlia form. A very free-blooming variety. ¼ oz. 45¢; ½ oz. 85¢; ¾ oz. \$1.65.

2904 SCARLET FLAME Truly there is no other Zinnia of such dazzling color as SCARLET FLAME. The well-shaped double flowers are a rich orange-scarlet and never fail to attract the attention of the passerby. Of immense size. ¼ oz. 45¢; ½ oz. 85¢; ¾ oz. \$1.65.

2894 DREAM The large flowers are a distinct shade of deep lavender shading to bright purple as the flowers age. The blooms are large, of fine form, and are borne most profusely. ¼ oz. 45¢; ½ oz. 85¢; ¾ oz. \$1.65.

2900 POLAR BEAR This is decidedly the finest of all white Zinnias. The flowers are of great size and pure in color. They are borne in wonderful profusion, simply covering the plants all during the summer and fall. ¼ oz. 45¢; ½ oz. 85¢; ¾ oz. \$1.65.

2834 DAHLIA-FLOWERED MIXTURE This is a complete mixture of Dahlia-Flowered Zinnias including a most remarkable range of bright and soft colors in the proper proportion. ¼ oz. 45¢; ½ oz. 80¢; oz. \$1.50.

Dwarf Zinnias This type is wonderfully adapted to borders or beds. The plants are compact and are covered with a multitude of flowers all during summer and fall. Well-grown plants measure 12 inches in height.

2817 DWARF FIREBALL (*Zinnia pumila coccinea plena*) Double flowers of a fiery scarlet. Free-flowering compact plants. ¼ oz. 35¢; ½ oz. 65¢; oz. \$1.20.

2819 DWARF SNOWBALL Very double Dahlia-like flowers, of the purest snow-white. Beautiful for beds or borders. ¼ oz. 35¢; ½ oz. 65¢; oz. \$1.20.

2826 PERFECTION MINIATURE Dwarf and compact plants averaging 9 inches in height and 2 feet in diameter, the whole becoming a complete mass of double flowers, ranging in color from yellow to brown, nearly all of which are perfectly double. The flowers measure 1¼ inches in diameter. ¼ oz. 35¢; ½ oz. 65¢; oz. 65¢.

Zinnias are a great Burpee specialty. We are growing every year many acres of this fine annual on Burpee's Fordhook Farms in Bucks County, Pennsylvania, and our extensive trials and careful selections are responsible for the excellence of Burpee's Zinnias.

BURPEE'S PANSIES

Our strains of Pansies are recognized to be far superior to the so-called large-flowered strains. The flowers are invariably of much larger size and heavier texture. Grown under favorable conditions, the plants will bloom for a long time. The varieties we list are all standards in their color classes and come true to name, with but an occasional sport, in contrast to the common large-flowered strains which are to a marked degree impure or sporting.

2421 Snow Queen A magnificent pure white of large size and heavy texture. A free bloomer with well-rounded flowers. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2423 Golden Queen The finest pure rich golden yellow Pansy in existence. The large flowers are well-shaped and borne most profusely. We have a particularly fine strain. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2427 Celestial Medium-size flowers of an attractive light blue color. Excellent for bedding, as it is very free flowering. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2429 Lord Beaconsfield Ultramarine-blue, shaded with violet, gradually shading to a velvety white on the upper petals. A most wonderful and showy Pansy with large flowers. $\frac{1}{16}$ oz. 20¢; $\frac{1}{8}$ oz. 35¢; $\frac{1}{4}$ oz. 65¢.

2430 Peacock A beautiful shade of violet-blue, as iridescent as the eye in peacock feathers. Blooms very freely and continuously. It is a most appealing variety of large size. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2431 Imperial Blue This has occupied a most prominent place for many years, which is not to be wondered at when we consider the remarkable freedom, large size, exquisite form, and beautiful color of the variety. The blooms are a bright ultramarine-blue with a large blotch of deeper blue on the three lower petals. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2433 Andromeda This fine mauve variety gives an unusual opportunity for delicate color combinations. A very free bloomer. $\frac{1}{16}$ oz. 30¢; $\frac{1}{8}$ oz. 55¢; $\frac{1}{4}$ oz. \$1.00.

2435 Royal Purple The flowers are remarkably large and bold. A beautiful deep rich royal purple, contrasting well with the green foliage. Beautiful and rich in color. Combines well with light shades and comes perfectly true. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2437 Victoria Pleasing wine-red or nearly blood-red flowers of well-rounded form. Extra fine and free flowering. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

Giant
Ruffled
Masterpiece

dered, blotched, or marked in ray-like veinings with contrasting colors. We feel confident that our special strain of this will give entire satisfaction. Grow plenty of this for spring sale. $\frac{1}{16}$ oz. 35¢; $\frac{1}{8}$ oz. 60¢; $\frac{1}{4}$ oz. \$1.10.

2424 Fire King This is an exceptionally bright variety with well-shaped flowers of good size. The lower petals have a broad band of bright golden yellow shaded with orange. Each of the petals has a large blotch of deep mahogany-red, shaded with purplish black in the center. The two upper petals are a bright and shining copper-brown with a deeper shading toward the base and a narrow edge of bright golden yellow. Truly magnificent. $\frac{1}{16}$ oz. 40¢; $\frac{1}{8}$ oz. 70¢; $\frac{1}{4}$ oz. \$1.35.

2422 Cardinal This magnificent variety belongs to the Cassier race, having flowers that have a well-defined dark blotch on the three lower petals. The flowers are a bright cardinal-red, shaded with mahogany. The three lower petals each have a deep blackish maroon blotch which stands out sharply from the small white and yellow eye. $\frac{1}{16}$ oz. 40¢; $\frac{1}{8}$ oz. 70¢; $\frac{1}{4}$ oz. \$1.35.

2441 Golden Bronze A fine large flower of an odd shade. Old gold or golden bronze with lighter margin. Blooms freely. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2442 Meteor The three lower petals are brown with bright canary-yellow border, and the two upper ones vary from reddish brown to dark purple, margined with gold or silver. The contrast of colors is striking and beautiful. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2443 Black King Large coal-black flowers of a velvety texture. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2445 President Carnot There are quite a number of Pansies which are more or less similar in coloring to PRESIDENT CARNOT, yet PRESIDENT CARNOT has always been the most outstanding in our trials. The flowers are unusually large and of such heavy substance that they are attractively waved and crinkled on the edges. The contrast of the large dark purple blotch and the broad pure white border is most attractive. $\frac{1}{16}$ oz. 35¢; $\frac{1}{8}$ oz. 65¢; $\frac{1}{4}$ oz. \$1.20.

2447 Lord Baltimore This is truly a giant among all Pansies. The flowers are of immense size and very much waved and crinkled. Each petal has a shining blotch of deep maroon-black and a bright outer band of a most intensely rich golden yellow. The veins of the petals carry the color of the deep blotch into the margin. Blooms most profusely. $\frac{1}{16}$ oz. 35¢; $\frac{1}{8}$ oz. 65¢; $\frac{1}{4}$ oz. \$1.20.

2449 Hortense Rose Each flower-petal is blotched with rose, varying in shade, but all delicately beautiful. Very large flowers. $\frac{1}{16}$ oz. 35¢; $\frac{1}{8}$ oz. 65¢; $\frac{1}{4}$ oz. \$1.20.

2451 Madame Perret The lower petals are usually canary-yellow, white, or rose-pink, marked with purple or crimson. The upper petals are either self-colored in bright red and deep purple or delicately outlined with white. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2450 Giant Bridesmaid Beautiful apple-blossom shadings or lovely rose on white ground. Delicate and beautiful. Blooms most profusely. $\frac{1}{16}$ oz. 30¢; $\frac{1}{8}$ oz. 55¢; $\frac{1}{4}$ oz. \$1.00.

2457 Trimardeau or Giant Mixed We highly recommend this mixture of Giant-Flowered varieties to all who desire a large-flowering and free blooming strain of Pansies. It has been carefully prepared to include the right proportion of the various colors described above, and also contains a number of fine large-flowered seedlings. It is unexcelled for bedding and is used extensively to raise free-flowering plants for spring sale. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 85¢; oz. \$2.55.

2463 Giant Ruffled Masterpiece The truly giant-sized flowers are of the most striking character; the petals have so much substance that they are heavily ruffled, giving them the effect of a double flower. The colors are mainly rich dark shades, bordered, blotched, or marked in ray-like veinings with contrasting colors. We feel confident that our special strain of this will give entire satisfaction. Grow plenty of this for spring sale. $\frac{1}{16}$ oz. 35¢; $\frac{1}{8}$ oz. 60¢; $\frac{1}{4}$ oz. \$1.10.

2513 Burpee Blend of Giant Fancy Pansies

Burpee Blend
of Giant Fancy
Pansies

This blend cannot be surpassed. It contains the largest and most beautiful of all blotched Pansies that have been developed after many years of careful and close selection.

The Burpee Blend contains only well-formed, expanded flowers of uniform large size with an unusual range of colors and markings. The texture of the blooms is heavy and thick, so that the blooms are well waved and crinkled on the edges. The large flowers are borne upon long and stiff stems which hold them well above the foliage and make them admirably suited for cutting. The seed of the Burpee Blend is necessarily expensive, but it is well worth all it costs.

$\frac{1}{16}$ oz. 75¢; $\frac{1}{8}$ oz. \$1.25;
 $\frac{1}{4}$ oz. \$2.25; oz. \$8.00.

2500 Steele's Mastodon

Greenhouse Special Mixture (O. K. outside)

Immense and well-shaped flowers with thick and well-waved petals. Includes everything from pure white to deep mahogany. The very fine lavender, rose, cerise, and light blue shades deserve special mention. This mixture is particularly fine for the greenhouse or for frames, but will do just as well out in the open.
 $\frac{1}{16}$ oz. 60¢; $\frac{1}{8}$ oz. \$1.00; $\frac{1}{4}$ oz. \$1.75; oz. \$6.00.

2461 Bugnot This is a very large-flowering strain with blooms of thick texture and rich coloring. Each petal has a large dark blotch and the color from this blotch radiates toward the margin of the petals. A unique and most beautiful strain that will please all Pansy lovers. $\frac{1}{16}$ oz. 35¢; $\frac{1}{8}$ oz. 65¢; $\frac{1}{4}$ oz. \$1.20.

2459 PARIS IMPROVED BLOTCHED This is another very fine large-flowered strain which blooms profusely and continuously. Each petal is marked with a well-defined, large dark blotch.
 $\frac{1}{16}$ oz. 30¢; $\frac{1}{8}$ oz. 55¢; $\frac{1}{4}$ oz. \$1.00; $\frac{1}{2}$ oz. \$1.90.

2460 Cassier's Giant The flowers are of immense size, and all are either three- or five-spotted. Very pretty and free-flowering.
 $\frac{1}{16}$ oz. 30¢; $\frac{1}{8}$ oz. 55¢; $\frac{1}{4}$ oz. \$1.00; oz. \$3.00.

2455 Striped, Mixed Nearly all plants are attractively striped and mottled in a wide range of shades. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2453 Auricula-Flowered Exquisite shades, resembling Auricula Primroses. Most free-flowering. $\frac{1}{16}$ oz. 25¢; $\frac{1}{8}$ oz. 45¢; $\frac{1}{4}$ oz. 80¢.

2420 Extra Fine Bedding Pansies, Mixed These are valuable for making beds where the size of the individual flower does not count so much. They are of stocky growth, and the plants are covered with blooms during the entire summer. They flower profusely from seed sown in the open early in the spring. Our mixture contains a remarkably large number of different colors, all bright and beautiful. $\frac{1}{16}$ oz. 20¢; $\frac{1}{8}$ oz. 35¢; $\frac{1}{4}$ oz. 65¢.

2417 Orchid-Flowered Pansies

This distinct and beautiful strain of Pansies will appeal to those who prefer delicate tints and soft shades of coloring including shades of chamois, terra-cotta, pink, lilac, rose, and orange. The blending of these beautiful tints gives a most charming color effect, as appealing as found in many of the most valuable Orchids. The flowers are all of fine form and good size. They bloom freely from spring until late in the fall, and the unique colorings are altogether different from any other Pansies.

$\frac{1}{16}$ oz. 50¢; $\frac{1}{8}$ oz. 95¢; $\frac{1}{4}$ oz. \$1.80.

Burpee's Asters

Asters are a very important crop for florists. In starting with good seed, giving the plants the proper cultivation, one will always realize a good profit from them. There is a great demand for young Aster plants in the spring by home gardeners, and it is worth while to sow a number of different varieties and colors in order to be prepared for the demand for cut-flowers.

Queen of
the Market
Shell-Pink

Queen of the Market

This is still the earliest of all commercial Asters. In order to have large flowers on long stems the plants should be kept growing without checking their growth in any way. The blooms are nearly round and when well grown measure fully three inches in diameter. The flower stems measure 10 to 12 inches in length. This type is grown extensively by florists who are eager to get the profits that are in the early kinds.

Daybreak Asters

The plants grow 10 to 15 inches tall and bloom most profusely throughout the summer. The flowers measure 2 inches in diameter and are borne in the greatest profusion. On account of their rather short stems they are grown exclusively for bedding or as pot plants.

Early Branching Royal

The Early Branching Royal Asters occupy a most important place. The flowers are large, measuring 3 1/4 inches in diameter, and they are fully double and nearly round in form. They make a strong growth, forming well-rounded compact bushes 2 to 3 feet in height. The blooms are carried upright on long and strong stems. We have had many enthusiastic letters from our florist friends in which they have praised our strain and told us that they made money on it. In season of bloom the Royal Asters come in just as the Queen of the Markets have passed their prime.

Shell-Pink**

Crego's Giant

These typical American Asters enjoy great popularity. It is a free-blooming strain of strong sturdy growth with large flowers borne in great abundance. The individual petals are loosely arranged and the center is tightly curled. They bloom about the same time as King Asters and on account of their artistic flowers are in great demand for all kinds of decoration.

Improved American

In this class we have grouped together those Asters which cannot be classed under the headings mentioned before. Practically all varieties, with the exception of Lavender Gem, are most wonderful for cutting. Lavender Gem, however, being of dwarfier growth, may be used for small bouquets or still better for bedding. All the varieties listed are of large size and fully double. Sensation, being somewhat smaller than the others, is outstanding on account of its rich deep ruby red color, which is found in no other Aster. Burpee's Aurora was an outstanding Burpee Novelty last year. The petals are exquisitely curled and twisted and are a bright shade of royal-blue with a broad stripe of pure white in the center. Florists have lately taken notice of Heart of France, which is a beautiful deep red flower of excellent size and formation, the plants growing 24 inches tall.

Burpee's Flower Seeds

Flower seeds of the finest varieties and highest quality have always been a specialty with the House of Burpee. **Floradale Farms** have come to be known as the California Home of Flowers, and in addition to the many acres devoted there to the production of flower seeds we grow annually a large number of important varieties at **Fordhook Farms** in Pennsylvania and **Sunnybrook Farm** in New Jersey. Those seeds which we do not grow on our own farms are produced under our direct supervision, and every possible safeguard is used to protect the quality of Burpee's Seeds.

In the list below we have not attempted to give descriptions, for this is primarily a business catalog. **BURPEE'S ANNUAL** for 1925, our retail catalog, is the Leading American Seed Catalog and gives detailed information and complete descriptions. If any further particulars are desired, we shall be glad to answer inquiries promptly and fully.

Our catalog is our only salesman. We do not send out traveling men to solicit florists' orders. Look through this catalog at your first opportunity and send your order directly to us by mail. It will be filled promptly and carefully.

We do not offer "Trade Packets" of flower seeds, as the name "trade packet" is indefinite. In every case we are offering suitable fractions of an ounce of the more expensive varieties at reasonable prices. If still smaller quantities are desired you may order "retail" packets (for which see **BURPEE'S ANNUAL**) at a discount of 25%.

**All FLOWER SEEDS listed in this catalog will
be sent to you postpaid at the prices quoted.**

We solicit your inquiries and your orders. We are ready to serve you and assure you of our heartiest co-operation in making your business a success.

Ageratum

AGERATUMS fill many a need. The Mexicanum varieties grow fairly tall and are useful for beds or borders. They are also usually grown in pots for winter blooming, keeping the temperature around 50 degrees. The Tom Thumb varieties are of dwarf compact growth and are used extensively as pot plants, bringing a good price any time during the winter or early spring. They are grown extensively for window boxes. Their luxurious growth and freedom of blooms make them fine for bedding.

Calendula

Calendulas are easily grown and will come in handy as cut-flowers. We pride ourselves with the Burpee strains of Calendula which we know from comparative tests occupy a unique place. Many florists who have given them a thorough trial would not grow any other strains. Be sure you have planted plenty of Calendulas for cut-flowers during winter, spring, summer, and fall.

Centaurea

CENTAUREA or Bachelor's Buttons are too well-known to need any description. The Imperialis and cyanus varieties are excellent for cutting. They do best during the cool weather and should be sown early in the spring. The cyanus varieties are also fine for forcing under glass, to bloom during August from seed sown in January. The Imperialis varieties can be forced under glass in gentle heat. Candidissima and Gymnocarpa make fine border plants.

Delphinium

DURING DELPHINIUM blooming time there is hardly any florist who ever has enough of these stately spikes to supply the cut-flower trade. DELPHINIUMS are hardy, and on account of their long flowering period and easy culture they occupy a place ahead of even Peonies and Phlox. Our strain of Belladonna Seedlings is particularly fine, ranging from light sky blue to deep rich purple. It is, however, the Belladonna Light Blue which seems to be in greatest demand for cut-flowers. Compact White and Compact Blue are of dwarfier growth and are planted mostly in the perennial border.

Dianthus

The Annual Pinks make a very showy bed or border of neat appearance and are quite attractive even when the plants are not in bloom. In the Lacinatus varieties the flower petals are deeply cut in and fringed. The Perennial DIANTHUS, Plumarius, and Scoticus, fl. pl. are excellent low growing plants for perennial borders or the rock garden. DIANTHUS barbatus is listed under Sweet William, and DIANTHUS caryophyllus is referred to mostly as Carnation and is listed under that heading.

Heliotrope

HELIOTROPES are splendid bedding plants, and if used for cutting the stems should be allowed to soak themselves full of water for a period of ten hours in a cool dark place. You will find among your plant trade in the spring a large number of customers who will buy small young plants for making garden beds.

Hollyhocks

(Althea rosea)

HOLLYHOCKS are an essential to the old-fashioned garden, giving a display which is not equaled by any other perennial. The florist will find a ready sale for plants either during spring or fall; and whenever he is called upon to plant a perennial border he should be sure to have some plants on hand for this purpose. Any surplus plants should be allowed to flower, as the handsome spikes will bring a good price.

Impatiens

Florists who have a plant trade during spring will need IMPATIENS for customers who want plants that will grow in a shady place. There is no flower that is as well suited for shady locations as the IMPATIENS, and the range of colors will give a variety from mid-summer until frost. IMPATIENS also makes a fine pot plant.

Larkspur

The Annual LARKSPUR is important for all florists. It may be grown for winter or spring blooming indoors or for an outdoor display and cut-flowers. Our list of varieties includes a wide range of beautiful colors, some of them quite new and rare among this class. For outdoor blooming sow the seed about March 1, carrying the plants in a cold-frame or spent hotbed. The flowers will begin to appear early in May and for a continuous supply for cutting another sowing should be made early in April in a cold-frame, setting the plants into the open during the early part of May. For a still later supply sow about the middle of June to give plenty of cut-flowers during the fall months, when the blue shades are particularly rare.

Musa

Florists who have trade with larger estates should not miss the opportunity of having some young plants of Musa, commonly known as Abyssinian Banana Tree, on hand. They make a wonderful show either in the conservatory or set as specimen plants on the lawn or in the center of other flower beds.

Nasturtiums

Few florists realize the opportunities with NASTURTiums. It is true that they are easily grown in any home garden, but planting the seed indoors and setting the plants into the open will provide fine long-stemmed flowers long before they will bloom in other gardens. While NASTURTiums cannot be recommended for bouquets, they represent a most charming class of plants which are useful for table decoration.

The varieties auricula and vulgaris are usually planted in low borders. The florists will find a demand for plants early in the spring. The Chinese Primroses are too well known to need description. They are a most important pot plant for winter and spring blooming.

Salvia

No other flowering plant is in as great demand during the spring season as Scarlet Sage or SALVIA. The variety Splendens is of strong bushy growth with bright red flowers. Dark Blood-Red is somewhat similar but a shade deeper in color. Zurich and America are both of more compact growth and excellent for bedding. Farinacea makes attractive spikes of bright light blue. It is remarkably fine for cutting. Patens is a perennial and has large rich blue flowers. It is used for both bedding and cutting.

Scabiosa

SCABIOSAS are good cut-flowers, lasting four to five days in water. They are valuable for table decoration, flower baskets, designs, and bouquets. For extra-early blooming sow the seed in March indoors. Sow outdoors early in May and again the middle of June.

FLOWERING BULBS AND ROOTS

The Florist, as well as the Landscape Gardener, will find much of interest in the following list. Burpee's Bulbs are selected with the same care and attention to Quality as are Burpee's Seeds. All of the bulbs and roots offered herein are first size (unless otherwise stated), sound and healthy, and sure to bloom if given reasonable care.

We take particular pains in specially packing bulbs and roots to insure their arrival in good condition and, for this reason, *always ship bulbs separately from seeds* when both are ordered. **When placing your order, specify when and how you wish your bulbs to be sent. We do not ship in freezing weather unless ordered to do so, and then only at customer's risk. Purchaser pays for transportation of Bulbs.**

Our collection of Dahlias is especially worthy of attention. Our lists of Cannas, Gladflowers, and Iris are not extensive but are carefully selected and comprise the best varieties for all purposes. Refer to BURPEE'S ANNUAL for 1925, our retail catalog, for complete descriptions.

If you plant Tulips, Hyacinths, Narcissus, Crocus, or Hardy Perennials, send in your name now to receive a copy of BURPEE'S FALL BULB CATALOG (issued September 1st).

NOTE: Three or more bulbs will be supplied at the dozen rates, 25 or more at the 100 rates, and 250 or more at the thousand rates.

Burpee's Ready-Made Collections of Vegetable and Flower Seeds

The collections listed in BURPEE'S ANNUAL for 1925 are intended primarily for the amateur, but are occasionally ordered by the commercial grower for his wife or to fill in the odd corner of the garden patch. To Market Gardeners, Garden Clubs, and Florists, we offer them at a special discount of 15% and, when twelve or more of a single collection are ordered, at a discount of 20%.

These discounts apply also to the special bulb assortments offered in BURPEE'S ANNUAL, when ordered in straight sets.

BURPEE'S SEEDS

for

Market Growers and Florists

Burpee's Floradale Farms in California are famous for Sweet Peas. Acres after acres of Burpee's Sweet Peas are spread out on Floradale like a great Turkish rug. In addition to Sweet Peas, many other flower-seed specialties are produced there, such as Floradale Daisy, Geranium, Golden African Daisy, Giant Petunias, Larkspur, Candytuft, Verbena, California Poppies, Marigold, and Calendula. The warm and even climate and the rich alluvial soil in the Lompoc Valley, California, are particularly suited for raising heavy, plump, and full-of-vitality seeds of nearly all kinds of flowers.
